## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 7, 9-13, 17 and 19-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamamoto et al. ['954]

Yamamoto et al. disclose a printer apparatus comprising a print engine [Fig. 2], a humidity sensor [28b], a temperature sensor [28a], a heater [27a], a humidifier [27b], and a controller [30] for controlling the temperature and the humidity within the printer apparatus [Col. 4, lines 25-41].

Regarding claims 11-13, 17 and 19-21, the claimed method steps are inherent from the product structures.

### ***Claim Rejections - 35 USC § 103***

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 2852

4. Claims 4-6, 8, 14-16, 18 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamamoto et al. in view of Inui et al. [‘418].

Yamamoto et al., as discussed above, disclose the claimed invention except for a fan.

Inui et al. discloses an image forming apparatus [Fig. 1] comprising a fan [14b].

It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the printer apparatus disclosed by Yamamoto having a fan as taught by Inui et al. for the purpose of preliminarily heating the recording medium.

Regarding claims 14-16, 18 and 22, the claimed method steps are inherent from the product structures.
